DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. This office action is responsive to amendment filed May 6, 2003 (paper No. 8) and issued as a first office action on merit because of introduction of new ground of rejection not necessitated by the applicant's amendment.
3. The after final amendment is not entered.
4. Claims 1-7 and 9-23 are currently pending and have been examined.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential

steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are explained as follows:

8. Claim 1 recites limitation "recording by the provider computer, collection of cost from the customer..", however, the claim fails to recite any communication link of the customer (e.g. via a customer computer) to the provider computer and receipt of the cost of the goods by the customer prior to recording of the cost (received) from the customer. Additionally, there is no communication link between the merchant (e.g. a merchant computer) and communication of indication of the delivery of the goods by the merchant communicated to the provider computer before, the authorizing step is performed.

Since, the receiving, recording and authorizing steps are performed by the provider computer, and since these steps require information from the customer and the merchant, a communication link and requisite communication of information amongst all three entities must be clearly recited.

Claims 2-7 and 9-12 inherit same defects as dependent claims. Independent claims 13 and 23 (and dependent claims)

Art Unit: 3624

contain similar deficiency as claims 1-7 and 9-12 discussed above and are rejected accordingly.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claim 1-11, 13-18 and 23 are rejected under 35

U.S.C. 102(e) as being clearly anticipated by Haseltine

(PGPUB-DOCUMENT-NUMBER: 20010037247) (hereafter

Haseltine).

Per claim 1, Haseltine discloses a method for managing a transaction for a sale of goods between a customer (buyer) and a merchant (seller) (abstract), the method comprising:

Receiving by a provider computer affiliated with a plurality of provider offices, a communication relating to the transaction that includes a cost of the goods ([0059] buyer 50 pays the service 40..affiliated provider offices are point-of-sale offices 42);

Recording, by the provider computer, collection of the cost from the customer at one of the plurality of provider offices in accordance with the communication (para [0059] or else pays a point-of-access associate which the customer

Art Unit: 3624

finds nearby, ... service 40 is providing services in the nature of escrow by holding buyer's payment until buyer is afforded an opportunity to inspect item);

Authorizing payment, by the provider computer, of the cost to the merchant after the merchant delivers the goods ([0059]If the item 551 is taken, then the service 40 releases or causes release of payment to the seller 50.sup.1.)).

Claim 2: cost from the customer..cost of goods plus a service charge.. (... other detailed of the transaction.. who pays shipping, fees of the service 40 and its point-of-access associates 42.., para [0056] and for additional details also refer to[0060])).

Claim 3: recording collection of a portion of the cost plus service charge ..and recording collecting reminder of the cost plus service charge (... other detailed of the transaction.. who pays shipping, fees of the service 40 and its point-of-access associates 42.., para [0056] and for additional details also refer to[0060])).

Claim 4-5: customer and merchant are located in a different country (Haseltine provides for both the customers (buyer 22) and the merchants (E-tailer) have access of the system via the Internet which reaches all users in the world, therefore this limitation is inherent, refer to Figure, 1, block 16 shows communication network e.g. Internet, Web by all entities of the claims).

Claim 6: refer to analysis of claim 1.

Claim 7: goods are delivered by the merchant to the one of the plurality of provider offices ([0059] buyer can visit point of access 42b.. inspect item there..).

Claim 8: cancelled.

Claim 9-10: authorizing, by the provider computer, release of goods to the customer after recording collection of cost from the customer and authorizing delivery by the provider computer (para [0059] the service 40 is providing services in the nature of escrow by holding buyer's payment...).

Claim 11: providing a hyperlink to a web site of the merchant (para [002] and [004] and Fig. 1, refer to block 40 who provides services to affiliated E-tailers via web and/or the Internet).

Claim 13 and 23 are analyzed as per corresponding method claim 1 which recite corresponding limitations.

Claim 14: refer to claim 5 analysis.

Claim 15: refer to claim 11 analysis.

Claim 16: refer to claim 3 analysis.

Claim 17: refer to claim 2 analysis.

Claim 18: refer to claims 7 and 9.

Claim 24: refer to claim 5 analysis.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 12 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haseltine.

Claim 12: Haseltine fails to teach that the provider computer determines shipment of the goods as a part of an aggregate shipment.

Official is notice is taken that aggregating goods for shipment is old and well known business practice. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to implement this process because aggregating goods (such as according to geographic address of the customer etc.) would reduce cost of shipment.

Claims 19-21: Haseltine fails to teach service charge and currency exchange as recited.

Official is notice is taken that including shipping and insurance cost to the service charge and further performing currency transaction are old and well known business practices in sales and specifically in e-commerce

Art Unit: 3624

transactions. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to implement these features as desired and needed by the merchant which would enable the merchant to sales in a desirable foreign currencies.

Claim 22: refer to claim 12 analysis.

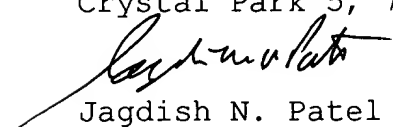

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
